Dear Doctor

Re: Piportil depot Injection – Update to supply issues

Sanofi wish to advise that additional testing for Piportil depot injection 50mg/mL, 1mL and 2mL presentations confirmed that the product meets the registered specification for release to market.

Supply of Piportil has therefore resumed.

At this time it is unclear whether there will be any longer term supply difficulties.

Sanofi are attempting to confirm ongoing availability with our manufacturer of Piportil depot injection and will advise as soon as possible.

Yours sincerely
Sanofi New Zealand
