7. [Product details](#)

1. What WATER FOR INJECTIONS is used for?

WATER FOR INJECTIONS contains sterile water for injections.

WATER FOR INJECTIONS is used to dilute or dissolve medicines.

2. What should I know before being given WATER FOR INJECTIONS?

Warnings

Your doctor or nurse will only use WATER FOR INJECTIONS to dissolve or dilute medicines for your treatment. WATER FOR INJECTIONS should not be injected directly.

Check with your doctor if you:

- are taking any other medicines, including any that you buy without a prescription from your pharmacy, supermarket or health food shop. Your doctor, nurse or pharmacist can tell you what to do if you are taking any of these medicines.

If you have not told your doctor about any of these things, tell them before you are given any injection.

During treatment, you may be at risk of developing certain side effects. It is important you understand these risks and how to monitor for them. See additional information under Section [6. Are there any side effects?](#)

Pregnancy and breastfeeding

Check with your doctor if you are pregnant or intend to become pregnant.

Talk to your doctor if you are breastfeeding or intend to breastfeed.

3. What if I am taking other medicines?

Tell your doctor or pharmacist if you are taking any other medicines, including any medicines, vitamins or supplements that you buy without a prescription from your pharmacy, supermarket or health food shop.

Check with your doctor or pharmacist if you are not sure about what medicines, vitamins or supplements you are taking and if these affect WATER FOR INJECTIONS.

4. How is WATER FOR INJECTIONS given?

How much is given

WATER FOR INJECTIONS is used to dilute or dissolve medicines for your treatment and is usually given by injection by a doctor or trained nurse.

5. What should I know while being given WATER FOR INJECTIONS?

Things you should do

Tell your doctor straight away if:

- the injection makes you feel unwell.

Looking after your medicine

WATER FOR INJECTIONS will be stored in the pharmacy or on the ward in a cool dry place where the temperature stays below 25°C.

Getting rid of any unwanted medicine

Your doctor, nurse or pharmacist will safely dispose of any WATER FOR INJECTIONS that is not used.

Do not use after the expiry date.

6. Are there any side effects?

All medicines can have side effects. If you do experience any side effects, most of them are minor and temporary. However, some side effects may need medical attention.

See the information below and, if you need to, ask your doctor, nurse or pharmacist if you have any further questions about side effects.

Less serious side effects

Less serious side effects	What to do
<ul style="list-style-type: none">• Bruising or swelling at the site of injection	Speak to your doctor if you

Less serious side effects	What to do
<ul style="list-style-type: none"> Fever and pain 	have any of these less serious side effects and they worry you.

Tell your doctor, nurse or pharmacist if you notice anything else that may be making you feel unwell.

Other side effects not listed here may occur in some people.

Reporting side effects

After you have received medical advice for any side effects you experience, you can report side effects to the Therapeutic Goods Administration online at www.tga.gov.au/reporting-problems. By reporting side effects, you can help provide more information on the safety of this medicine.

Always make sure you speak to your doctor, nurse or pharmacist before you decide to stop taking any of your medicines.
